

VIRUTEX CE53 SLIPPING PLANER

The Virutex CE53S Edge Lipping Planer for Perfect Flush Edges 5300199 is a professional-grade edge finishing solution engineered for precision flush trimming of solid wood, veneer, and edge lippings. Designed specifically for furniture manufacturing and high-end woodworking applications, this planer delivers exceptional surface quality, smooth transitions, and consistent results. Its wide support base ensures superior stability and safe operation, making it an essential tool for achieving flawless finishes on both straight and curved panel edges.

EQUIPMENT DESIGN & SCHEMATIC BLUEPRINT

SYSTEM CAPACITIES & TECHNICAL SPECIFICATIONS

Specification ParameterVirutex CE53S Standard Capabilities

Model Number	CE53S (5300199)
Input Power	1,300 W
Planing Width	55mm
No-load Speed	10,000 RPM
Cutting Depth	0–5mm
Machine Weight	6.5 kg
Insulation Rating	Double Insulated
BladeType	Reversible carbide blades
Dust Extraction	Integrated dust collector connection

PRIMARY APPLICATIONS

- **Flush Trimming:** Perfectly levels edge lippings on furniture panels and cabinet components.
- **Material Versatility:** Precision finishing of solid wood, veneer, and laminated edges.
- **Industry Sectors:** Ideal for furniture manufacturing, cabinet making, and custom woodworking projects.
- **Professional Environments:**
Designed for workshop and production environments requiring consistent high-quality edge finishing.
- **Flawless Results:** Best for professionals who require perfectly flush edges with smooth transitions and consistent surface quality.

WHY CHOOSE THE VIRUTEX CE53S

- **Unmatched Precision:** Delivers precise, flush edge finishing for high-end furniture and woodworking projects.
- **Superior Stability:** Stable and controlled operation with a wide support base for improved accuracy.
- **Heavy-Duty Power:** Powerful 1,300 W motor ensures consistent performance even during prolonged use.
- **Cost-Effective Operation:** Low-maintenance design with reversible carbide blades for long-term efficiency.
- **Clean Workspace:** Integrated dust extraction for cleaner working conditions and significantly better results.

PERFORMANCE & CONSTRUCTION FEATURES

- Purpose-Built Design** Specifically engineered as an edge lipping planer for flush trimming, delivering superior accuracy compared to conventional planers.
- Wide Support Base** Features a wide support base that provides excellent stability, ensuring controlled movement and enhanced operator safety.

- Precision Calibration** Precision depth adjustment system allows fine calibration relative to the cutter-holder plane for exact material removal.
- High-Performance Motor** The 1,300 W motor delivers consistent power for smooth cutting action and efficient workflow in demanding environments.
- Carbide Blades** Reversible carbide blades ensure long service life, consistent cutting quality, and quick maintenance without complex adjustments.
- Clean Flush Finishing** Eliminates overcutting, tear-out, and surface imperfections for consistent, professional-grade results on every pass.
- Dust Extraction** Integrated dust extraction connection improves visibility, drastically reduces debris, and supports a cleaner and safer workspace.
- Operator Safety** Double insulation greatly enhances electrical safety for daily professional workshop use.

The Virutex CE53S is a premium solution for professionals who demand precision, durability, and flawless finishing in every edge trimming application.
