

VIRUTEX RZ270S DOOR CUTTER

DOOR CUTTING PRECISION • ADJUSTABLE DEPTH • PROFESSIONAL TOOL

The Virutex Cutting Machine For Doors RZ270S 7000399 is a specialized, high-performance cutting solution designed for precise trimming of doors, door frames, baseboards, and skirting boards. Ideal for professional installers working with parquet, laminate, carpets, and ceramic flooring, this machine delivers clean, accurate cuts quickly and efficiently. Its powerful motor, combined with precision adjustment systems, ensures consistent results in demanding installation environments.

EQUIPMENT DESIGN & SCHEMATIC BLUEPRINT

SYSTEM CAPACITIES & TECHNICAL SPECIFICATIONS

Specification Parameter	Virutex RZ270S Standard Capabilities
Model Number	RZ270S (7000399)
Input Power	1,300 W
No-load Speed	5,000 RPM
Cutting Depth	0 – 47 mm (Fully Adjustable)
Cutting Height Range	8 mm (Minimum) – 35 mm (Maximum)
Insulation Rating	Double Insulated (Electrical Safety)
Machine Weight	5.6 kg
Included Accessories	Carbide saw blade Z24, 3.5 m dust collection pipe, carrying case, service keys

PRIMARY APPLICATIONS

- **Flooring Clearance:** Cutting and trimming doors perfectly to size for new flooring installation clearance.
- **Frame Adjustment:** Precision undercutting of door frames, baseboards, and skirting boards directly on-site.
- **Diverse Materials:** Ideal for parquet, laminate, heavy carpet, and dense ceramic flooring installations.
- **Professional Carpentry:** Essential for on-site professional carpentry, renovations, and specialized installation work.
- **Clean Finishes:** Best for flooring installers and carpenters who require fast, precise, and clean cuts with zero tear-out.

WHY CHOOSE THE VIRUTEX RZ270S

- **Absolute Precision:** Delivers flawless, clean cuts for highly sensitive door and frame adjustments.
- **Ultimate Versatility:** The go-to tool for high-end flooring installers working with multiple dense materials daily.
- **On-Site Flexibility:** Micro-adjustable settings ensure millimeter accuracy and total flexibility on unpredictable job sites.
- **Maximum Efficiency:** Powerful single-pass cutting severely reduces labor time and heavy physical effort.
- **Built for the Road:** Highly portable and fiercely durable design specifically engineered for professional job site transport and use.

PERFORMANCE & CONSTRUCTION FEATURES

- Purpose-Built Design

A true, purpose-built door cutting machine designed exclusively for trimming doors, frames, and skirting boards with unyielding precision.
- 1,300W Power Plant

A powerful 1,300 W motor ensures incredibly clean, fast cutting performance without bogging down, even on dense hardwood materials.

Millimetric Control

Features easily adjustable cutting height and depth utilizing integrated millimetric gauges for exact control and perfectly repeatable results.

Single-Pass Cutting

Full 47mm depth cutting capability aggressively allows standard doors to be cut in a single, fluid pass, vastly improving efficiency on-site.

High-Speed Action

Extreme high-speed operation at 5,000 RPM consistently delivers smooth cutting action and leaves glass-smooth, clean finishes.

Dust Extraction

Advanced dust extraction system includes a dedicated nozzle and a 3.5 m pipe for seamless connection to external vacuums, improving visibility and job site cleanliness.

Portable Ergonomics

Features a highly ergonomic profile and inherently portable design, fully equipped with an included hard carrying case for safe transport between demanding job sites.

Double Insulation

Industry-standard double insulation structurally enhances operator electrical safety during intense, daily professional use.

Carbide Tooling

Ships standard with a premium Carbide saw blade (Z24), guaranteeing extreme blade longevity and continuous sharpness through hard materials.
