

Virutex CE89E Chamfering Planer

The Virutex CE89E Chamfering Planer For Edge Finishing (120V) 8900199 is a lightweight, powerful, and professional-grade tool designed for precise chamfering and edge finishing applications. Built for efficiency and accuracy, this planer is equipped with replaceable twin-use hard metal knives that require no adjustment, ensuring consistent performance and minimal downtime. With its ergonomic design, integrated dust collection capability, and robust 700 W motor, the Virutex CE89E Chamfering Planer For Edge Finishing (120V) 8900199 is ideal for woodworking professionals seeking clean, accurate edge finishes.

TECHNICAL SPECIFICATIONS

Specification Parameter	CE89E Standard Capabilities
Model Number	8900199
Input Power	700W
Cutting Width (90 °)	25mm
Cutting Depth	0 – 12.5 mm
No-Load Speed	16,500 RPM
Weight	3.3 kg
Insulation	Double Insulated

PRIMARY APPLICATIONS

- **Panel Edging:** Chamfering edges on solid wood panels and boards.
- **Cabinetry Preparation:** Edge finishing for cabinetry and furniture components.
- **Coating Prep:** Preparation of edges prior to coating or assembly.
- **Precision Trimming:** Essential for intricate woodworking and carpentry projects.
- **Versatile Deployment:** Perfect for both workshop and on-site finishing applications.

WHY CHOOSE THE VIRUTEX CE89E

- **Instant Setup:** Precision chamfering with minimal setup and no blade adjustment required.
- **Portable Power:** Lightweight yet powerful design for effortless transport.
- **Professional Durability:** Durable construction designed specifically for professional woodworking.
- **Workspace Safety:** Efficient dust collection radically improves cleanliness and safety.
- **High-Speed Consistency:** Reliable performance with high-speed cutting delivering flawless results.

PERFORMANCE & CONSTRUCTION FEATURES

High-Performance Motor	The 700 W motor delivers powerful and consistent cutting for intensive professional applications.
Twin-Use Knives	Replaceable twin-use hard metal knives require zero adjustment, actively reducing downtime and ensuring precision.
Wide Cutting Capacity	Handles significant stock removal with up to 25 mm width and an adjustable cutting depth of up to 12.5 mm.
Ergonomic Handling	The lightweight structure combined with ergonomic grip contours vastly improves handling and reduces user fatigue.
High-Speed Finish	Operates at an exceptional 16,500 RPM, ensuring incredibly smooth and clean chamfer finishes across material grains.
Integrated Dust Port	The built-in dust extraction connection keeps the workspace clear of debris and drastically improves operational visibility.

DoubleInsulation

Features a comprehensive double insulation system that significantly enhances safety and durability in demanding jobsite environments

SecureStorage

Includes a dedicated, rugged carrying case for highly convenient transport and secure tool storage between uses.

The Virutex CE89E Chamfering Planer For Edge Finishing is a dependable, high-performance tool making it an essential addition to any professional woodworking setup.
