

VIRUTEX EB10C COMPACT EDGEBANDER

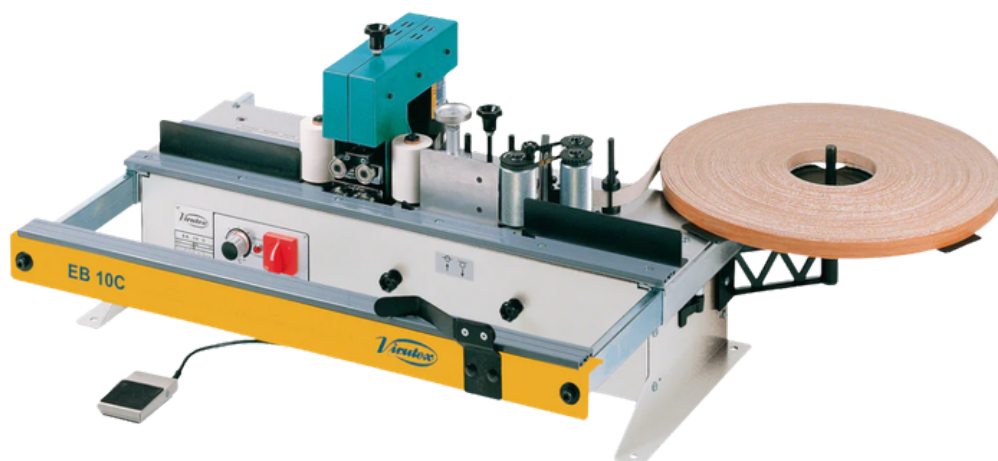

COMPACTDESIGN•HOTAIRSYSTEM•DUALTRIMMING

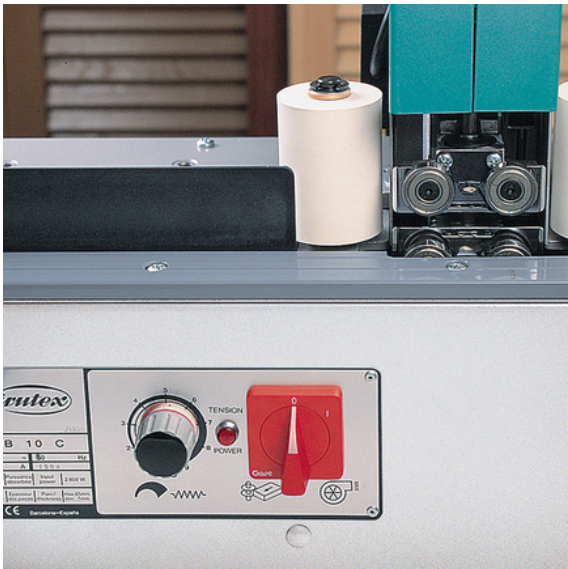

The Virutex EB10C Compact Edgebander Machine 5100097 is a powerful and efficient solution for edge-banding panels using pre-glued materials. Designed for simplicity and speed, this compact machine utilizes a high-performance hot air system with electronic temperature control, delivering reliable bonding without the need for compressed air or external dust collection systems.

PRIMARY APPLICATIONS

- **Materials:** Edgebanding with pre-glued PVC, melamine, and wood veneer tapes.
- **Geometries:** Processing straight and curved panels with consistent, professional results.
- **Target Operations:** Ideal for furniture manufacturing, custom cabinetry, and panel finishing.
- **Workshop Fit:** Plug-and-play solution designed for compact and mobile workspace environments.
- **Utility Independence:** Perfect for job sites or shops where compressed air systems are not available.

TECHNICAL SPECIFICATIONS

Specification Parameter	EB10C Machine Capabilities
Input Power	2,850W
Edging Thickness Range	7–65mm
Temperature Control Range	0–500 ° C (electronic adjustment)
Voltage/Frequency	200–250V (1 Phase)
Machine Dimensions	600 × 950 × 430 mm
Net Weight	35kg
Integrated Trimming Unit	AK97NW Motorized dual-side trimming

PERFORMANCE & FEATURES

- **Hot Air Bonding:** Activates pre-glued tapes for clean, high-strength adhesion.
- **Electronic Control:** Precise temperature settings upto 500 ° C for various material types.
- **Rapid Heat-Up:** Ready in ~2 minutes to minimize setup downtime.
- **Motorized Dual Trimming:** Ensures clean finishing across top and bottom edges simultaneously.
- **Automatic End Cut:** Consistent, clean end trimming at the finish of each pass.
- **Curved Component Pedal:** Rear foot pedal control for precise curved workpieces.

WHY CHOOSE THE EB10C

- **No Compressed Air Required:** Eliminates costly pneumatic set ups and complex lines.
- **Self-Contained Operation:** No dust extraction system required for standard setups.
- **Compact Footprint:** Optimizes floor space while delivering commercial capability.
- **Plug-and-Play Setup:** Fast operational deployment for small shops or job sites.
- **Precision Trimming:** Factory-installed dual-edge trimming unit ensures clean joints.

The Virutex EB10C Compact Edgebander Machine 5100097 delivers a perfect balance of portability, power, and precision for professional panel finishing.
